The Largest Daily Gas Supply volume record on January 15, 2004

Tokyo Gas Co., Ltd.

Daily gas supply volume on January 15, 2004 was 44.92 million cubic meters, which has broken the past record (44.07 million cubic meters on the previous day) and has become our new record.

Although the average temperature on January 15 was slightly higher than the previous day, the temperature in early morning was quite low and demand in both hot water and heating was very strong. In addition, increased demand for city gas with added consumption by new customers in both industrial and business sectors also contributed to the new record.
