The Largest Daily Gas Supply volume record on February 6, 2006

Tokyo Gas Co., Ltd.

Daily gas supply volume on February 6, 2006 was 50.62 million cubic meters, which has broken the past record (49.95 million cubic meters on January 13, 2006) and has become our new record.

As the temperature was low throughout the day, demand for hot water was very strong. In addition, the base demand was increased with acquisition of new customers in both industrial and business sectors, which also contributed to the new record.
