

July 28, 2006  
Tokyo Gas Co., Ltd.

**Major Questions and Answers  
on the Announcement of FY2006 1Q Ending June Financial Results**

Q: Recently, there are some concerns about the safety of gas. As one of the leading gas companies, how would Tokyo Gas respond to these concerns?

A: Customer safety is our priority. Tokyo Gas will make every effort to assure the safety of our gas. Specifically, we are visiting our customers' houses, checking gas appliances and giving safety advice to our customers.

Q: I heard that long-term supply contracts are often used for the supply of LNG. Then how are you trying to acquire LNG with a more competitive price?

A: We usually use a price formula rather than a fixed price in long-term contracts. In order to lower and stabilize the price of LNG, we tend to reform the price formulas and make LNG price less affected to oil price.
