I. Overview of Business Performance, etc.

(1) Overview of business performance and financial position of FY2016

(Business performance of FY2016)

During FY2016, the Japanese economy remained on a gradual recovery trend with steady improvements in the employment and income environment, increases in employee compensation, and corporate income remaining at a high level, despite the lack of strength in the growth of consumer spending and capital expenditure, among others. Meanwhile, the global economy faced further uncertainties amid risks of vulnerability of the economies of emerging countries and resource-rich countries, as well as the support for an exit from the EU in the referendum in the U.K.

Against this economic backdrop, the environment surrounding the energy business has undergone dramatic changes, such as the full liberalization of retail sales of electricity in April 2016 and the full liberalization of retail sales of gas in April 2017.

Amid these dramatic environmental changes, the Tokyo Gas Group has been making multifaceted and comprehensive preparations to expand added value for our customers through comprehensive energy proposals so that customers would continue to choose Tokyo Gas.

Although we had been making such intensive efforts, city gas sales decreased from a decline in sales unit price due to resource cost adjustment associated with lower crude oil prices, despite a year-on-year increase in gas sales reflecting the lower temperatures in winter FY2016 than the previous year. As a result, consolidated net sales for the year dropped 15.8% year-on-year to ¥1,587.0 billion.

In terms of operating expenses, further improvement in management efficiency and extensive efforts to contain expenses, as well as the decline in oil prices that led to lower gas resource costs, resulted in a 9.7% year-on-year decrease in operating expenses to ¥1,528.7 billion.

As a result, operating income dropped 69.6% year-on-year to ¥58.3 billion, and ordinary income decreased 70.5% to ¥55.6 billion. With the recording of extraordinary income consisting of gain on sales of non-current assets (¥6.6 billion) and gain on sales of investment securities (¥9.1 billion), as well as extraordinary loss consisting of impairment loss on overseas upstream projects (¥2.4 billion), and income taxes, net income attributable to the parent company dropped 52.5% to ¥53.1 billion.

With effect from FY2016, the reporting segments were changed. Therefore, the comparison of figures between FY2015 and FY2016 is made by changing the reporting segments for FY2015. Please see page 17 “3) Segment information, etc.” for details.

<Segment summary>

1) City gas

Gas sales volume for FY2016 increased 1.8% from the previous term, to 15,720 million m³. Of this amount, residential demand was 3,466 million m³ (a 3.0% increase), due mainly to higher demand for hot water supply affected by lower temperatures in winter FY2016 than the previous term.

Commercial demand was 2,709 million m³ (a 1.2% increase), with a rise in air-conditioning demand due to higher temperatures in late summer FY2016 than the previous term, and an increase in demand for hot water supply and air-conditioning on the back of lower temperatures in winter FY2016 than the previous year.

Industrial demand was 7,293 million m³ (a 0.8% increase), primarily driven by the expanding demand for industrial-use, especially for power generation.

Wholesale supplies to other gas utilities grew 4.2% to 2,252 million m³ due to a growth in customer demand.

Reflecting the downward gas unit price adjustments under the gas rate adjustment system, city gas sales dropped ¥254.6 billion, or 19.7%, to ¥1,040.0 billion, despite an increase in gas sales volume.

With a drop in resource costs due to a decline in LNG prices from the lower crude oil prices, total operating expenses declined 12.6%, by ¥139.0 billion, despite an increase in gas sales volume.

As a result, segment income decreased ¥115.5 billion, or 60.2%, year-on-year to ¥76.5 billion.

<Consolidated Gas Sales Volume for FY2016 Ended March 31, 2017>

			FY2016	FY2015	Change	% change

Notes:

- No. of customers indicates the number of Tokyo Gas' city gas meters installed within the supply area as of end of March 2017.
- "Commercial" indicates sales to commercial, public and medical institutions.
- Gas sales volumes are on the basis of 45MJ/m³.
- Average temperature is the average temperature during the period of use by each customer (from date of initial month's meter reading to final month's meter reading).

The aforementioned notes also apply to the relevant tables.

(Financial position in FY2016)

1) Situation of assets, debt and shareholders' equity

Assets as of March 31, 2017, totaled ¥2,230.2 billion, a ¥21.3 billion decrease from March 31, 2016, reflecting decreases in cash and deposits (¥37.6 billion) and notes and accounts receivable-trade (¥7.1 billion), despite increases in property, plant and equipment and intangible assets (¥22.1 billion) due to capital expenditure and depreciation.

Liabilities dropped ¥18.9 billion to ¥1,117.4 billion, on decreases in the outstanding amount of net defined benefit liability (¥15.9 billion) and interest-bearing debt (¥2.2 billion).

Net assets totaled ¥1,112.8 billion. This included a decrease in shareholders' equity (¥15.6 billion) from the purchases of treasury stock in the market (¥40.9 billion) and payment of dividends from surplus (¥26.9 billion) despite an increase in net income attributable to owners of parent (¥53.1 billion).

With the rate of increase in shareholders' equity (calculated as the total of shareholders' equity and valuation and translation adjustments) above the growth rate for total assets in line with a decrease in the total assets, the shareholders' equity ratio rose 0.5 percentage points from March 31, 2016, to 49.4% as of March 31, 2017.

2) Situation of cash flow

(Unit: hundred million yen)

	FY2016	FY2015	Change
Cash flow from operating activities	2,387	3,546	-1,159
Cash flow from investing activities	-2,048	-2,364	316

Cash and cash equivalents at beginning of year	1,701	1,283	418
Cash and cash equivalents at end of year	1,325	1,701	-376

a) Cash flow from operating activities

Cash and cash equivalents obtained as a result of operating activities totaled ¥238.7 billion. This was primarily from the recording of income before income taxes (¥69.0 billion) and depreciation and amortization (¥160.8 billion), despite income taxes paid (¥-33.6 billion).

b) Cash flow from investing activities

Cash and cash equivalents used as a result of investing activities totaled ¥204.8 billion. Despite proceeds from sales and redemption of investment securities (¥9.4 billion), outlays for purchase of property, plant and equipment (¥-165.9 billion) as well as outlays for purchase of intangible assets (¥-29.5 billion) associated with capital expenditures for the establishment of production and supply system resulted in a net outflow.

c) Cash flow from financing activities

Cash and cash equivalents used as a result of financing activities totaled ¥70.8 billion. Despite proceeds from issuance of bonds (¥30.0 billion), payments for purchase of treasury stock (¥-41.0 billion), outlays for redemption of bonds (¥-27.7 billion), and cash dividends paid (¥-26.9 billion) resulted in a net outflow.

(2) Future outlook

We are forecasting a 3.6% decrease from the previous year in gas sales volume for FY2017, to 15,148 million m³, based on assumption of several factors, including a drop in wholesale demand from the previous year, despite a forecast of an increase in residential demand due to assuming an average temperature in line with normal years. We expect city gas sales to increase by ¥113.3 billion, or 10.9%, to ¥1,153.3 billion, on upward unit price adjustments under the gas rate adjustment system in accordance with the rate adjustment for gas resource costs. At the same time, with regard to operating expenses, we are forecasting an increase in resource costs, mainly reflecting a rise in crude oil prices. Since electricity sales volume is expected to increase on the back of a rise in the number of retail sale transactions, we expect electricity net sales and operating expenses to increase. Operating expenses are expected to decrease due to the decline in net actuarial gain (loss).

Due to these factors, we are projecting a ¥226.0 billion, or 14.2%, increase in consolidated net sales to ¥1,813.0 billion, with a ¥23.7 billion, or 40.5%, increase in operating income to ¥82.0 billion, a ¥19.4 billion, or 34.7%, increase in ordinary income to ¥75.0 billion, and a ¥1.9 billion, or 3.5%, increase in net income attributable to owners of parent to ¥55.0 billion.

The economic frame assumed for FY2017 is ¥115.00/\$ for foreign exchange rate for the full-year, and \$55/bbl for the full-year for crude oil price.

(5) Notes on consolidated financial statements

1) (Note on going concerns' premise)

Not applicable

2) (Change in accounting policies or estimates and retrospective restatements)

Change in accounting policy

Due to the revision of the Corporation Tax Act, the Company applied the "Practical Solution on a Change in Depreciation Method due to Tax Reform 2016" (the Practical Issues Task Force No.32 dated June 17, 2016) from FY2016. Therefore, for the equipment attached to buildings and structures, which were acquired on and after April 1, 2016, the depreciation method was changed from the declining-balance method to the straight-line method.

The effect of these changes on profit and loss was immaterial.

Additional information

The Company applied the "Revised Implementation Guidance on Recoverability of Deferred Tax Assets" (the Application Guidelines for Accounting Standards No.26 dated March 28, 2016) from FY2016.

3) (Segment information, etc.)

1. Overview of reporting segments

The Group's reporting segments are regularly reviewed by the Board of Directors using the segregated financial information available within each segment to determine the allocation of management resources and evaluate business results.

In the "Main Policies FY2015–2017 for Realizing the Challenge 2020 Vision" that was announced in October 2014, the Tokyo Gas Group aimed to evolve as a total energy business and accelerate its global business development, as well as examining the ways of the Group's business management in order to promote growth areas and realize the Vision. Consequently, it has decided to review the Group's reporting segments as below, following the introduction of a new Group business management scheme in FY2016.

In addition to deepening the city gas business, the core of the Group's operating structure, the Vision considers the electric power business as a pillar of the Group's revenues and also aims to expand our business abroad to remake ourselves as a global company group, while continuing to base our business in the Tokyo metropolitan area. Since such growth areas will form important groups in future decision-making in management, the "electric power business" and "overseas business" became independent segments.

In addition, we have broken up energy that is created using natural gas as the raw material in the traditional way into "city gas" and other energy. Other energy, including the engineering solutions business and liquid gas business, which use such energy, has been reorganized as the "energy related" segment.

Furthermore, businesses involving the efficient utilization of the Group's real estate holdings represent another earnings base, and the Group therefore uses the five reporting segments of "city gas," "electric power," "overseas," "energy related," and "real estate."

The segment information for FY2015 was prepared based on the revised reporting segments.

The main products and services of each reporting segment are as follows:

City gas: City gas

Electric power: Electric power

Overseas: Overseas resource development

Energy related: Engineering solutions business (engineering, energy service, etc.), liquid gas business (liquefied petroleum gas, industrial gases), LNG sales, gas appliances, gas installation work, construction, etc.

Real estate: Leasing, management, etc. of land and buildings

2. Calculation of net sales, profit and loss, and assets, etc.

The accounting method of reported business segments has not been changed from what is described in the important matters that form the basis of preparation of consolidated financial statements in the latest securities report (submitted June 26, 2016), apart from the changes stated in 2).

Income of reporting segment is based on operating income plus or minus investment gain or loss on equity method.

Intersegment sales and transfers are attributable to transactions within group companies, and calculated based on market value.
