

## Fluctuation in Feedstock Prices and Adjustment of Gas Rates

Tokyo Gas Co., Ltd.

In accordance with the provisions for rate adjustment for feedstock costs, Tokyo Gas has set the unit commodity charge for meter readings over the months January-March 2007 upward by 2.21 yen per cubic meter (45MJ) relative to the corresponding charge for meter readings for October-December 2006.

This adjustment is based on the average feedstock prices over the months of July-September 2006.

Customers will be notified of the gas rates applied to meter readings over the months during January and March 2007 by means of notices posted in Tokyo Gas business offices and their meter reading slips for December in advance.

Reference: Outline of the feedstock cost adjustment scheme

- \* The scheme provides for adjustment of the unit commodity charge in gas rates (i.e., the charge per cubic meter of gas consumed) at three-month intervals in correspondence with fluctuation in feedstock prices owing to factors such as exchange rates and crude oil prices.
- \* The unit commodity charge is adjusted by 0.08505 yen per cubic meter for each 100 yen of fluctuation in feedstock price, based on the difference between the standard average feedstock price (35,910 yen per ton) and average feedstock price (calculated on the basis of LNG and LPG import prices in the quarter in question).
- \* The fluctuation in feedstock prices is calculated on the basis of actual values in customs clearance statistics for both LNG and LPG.
- \* Arrangements have been made to avoid both small and frequent rate adjustments as well as large fluctuations. The specific provisions are as follows.
  - There is no adjustment of gas rates if the difference between the standard average feedstock prices (35,910 yen/ton) and average feedstock price is less than 1,800 yen.
  - Even if the average feedstock price exceeds the upper limit of 57,460 yen, the amount of 57,460 yen is applied in the calculation of the gas rate adjustment.
