

Gas rates for April 2011
based on fluctuation in gas resource cost and adjustment of gas rates
(Tokyo District)

Tokyo Gas Co., Ltd.

In accordance with the provisions for gas rate adjustment system, Tokyo Gas has set the unit commodity charge for meter readings in April 2011 upward by 0.75 yen per cubic meter (45MJ) relative to the corresponding charge for meter reading for March 2011.

The adjustments are made reflecting the increase in average resource costs in November 2010– January 2011.

With this adjustment, for meter readings during April of the standard household consuming 34m³(45MJ/ month) in the Tokyo district etc., the monthly gas tariff will increase by 25 yen (tax included) from that of March (previous month).

1. Supply contract rate

(Application of rate schedule A~F as appropriate for the amount of gas use in the month in question)

	Rate A	Rate B	Rate C	Rate D	Rate E	Rate F
Monthly consumption volume	0 to 20m ³	21 to 80 m ³	81 to 200 m ³	201 to 500 m ³	501 to 800 m ³	over 801 m ³
Basic charge (yen/month)	724.50	1,081.50	1,333.50	2,467.50	5,722.50	13,618.50
Commodity charge(yen/m ³)	140.54	122.69	119.54	113.87	107.36	97.49
<Reference> Commodity charge(yen/m ³) March 2011	139.79	121.94	118.79	113.12	106.61	96.74

2. Effect on a standard customer in residential sector

Monthly consumption volume of 34 cubic meters(45MJ/m ³)	yen/month		
	Charge applied for March 2011	Charge applied for April 2011	Change
Including the national consumption tax	5,227	5,252	25

*The volume of standard customer is calculated based on the average of 5years (FY2001-2005) usage per household per month.

3. Fluctuation in gas resource prices

	yen/ton		
	Oct.-Dec., 2010	Nov.,2010 -Jan., 2011	Difference
Standard average gas resource price (1)	53,810		/
Average gas resource price (2)	47,810	48,690	880
LNG	47,150	47,790	640
LPG	64,320	70,940	6,620
Difference (2) - (1)	-6,000	-5,100	900

Note: Both LNG and LPG prices are based on customs clearance statistics.

:"Difference(2)-(1)" are rounded down to the nearest hundred yen

4. Calculation of unit charge adjustment

Calculation of unit charge adjustment for gas resource costs

●Calculation of average gas resource prices

Average LNG price (customs clearance statistics value)	47,790 yen/ton	x 0.9604	
Average LPG price (customs clearance statistics value)	70,940 yen /ton	x 0.0393	
+)			
	48,685.45		
	↓ (rounded to the nearest ten yen)		
	48,690 yen/ton		

●Calculation of the amount of gas resource price fluctuation

48,690 yen/ton	- 53,810 yen/ton =	-5,120 yen/ton	
		(omission of amounts less than 100 yen)	
		↓	
		-5,100 yen/ton	

●Calculation of the adjusted rate (charge per cubic meter)

Adjusted rate=	-5,100 yen	/ 100 yen x 0.084 (*)	
(unit charge)			
	= -4.29 yen	(rounding up of amounts less than 0.01 yen)	

* The unit commodity charge is adjusted by 0.084(0.080×1.05) yen per cubic meter for every 100 yen of fluctuation

* Effect on a standard customer in residential sector

			yen/month
Monthly consumption volume of 34 cubic meters(45MJ/m ³)	Charge applied for March 2011	Charge applied for April 2011	Change
Including the national consumption tax	5,227	5,252	25

*Method of calculation for the standard gas rate in residential sector (including the national consumption tax)

= Standing charge (1,081.50 yen)

+ Commodity charge (126.98 yen + -4.29 yen) x 34m³

↑

Commodity charge at the time of notification of the rate revision

Reference: Outline of the gas resource cost adjustment scheme

- * The scheme provides for adjustment of the unit commodity charge in gas rates (i.e., the charge per cubic meter of gas consumed) every month in correspondence with fluctuation in gas resource prices owing to factors such as exchange rates and crude oil prices.
- * The unit commodity charge is adjusted by 0.084 yen per cubic meter for each 100 yen of fluctuation in gas resource price, based on the difference between the standard average gas resource price (53,810 yen per ton) and average gas resource price (calculated on the basis of weighted average cost of LNG and LPG import prices in the previous 3-5 months).
- * The fluctuation in gas resource prices is calculated on the basis of actual values in customs clearance statistics for both LNG and LPG.
- * Arrangement has been made to avoid price hike.
Even if the average gas resource price exceeds the upper limit of 86,100 yen, the amount of 86,100 yen is applied in the calculation of the gas rate adjustment.
