

Gas rates for August 2013
based on fluctuation in gas resource cost and adjustment of gas rates
(Tokyo District, etc.)

Tokyo Gas Co., Ltd.

In accordance with the provisions for gas rate adjustment system, Tokyo Gas has set the unit commodity charge for meter readings in August 2013 upward by 1.38 yen per cubic meter (45MJ, tax included) relative to the corresponding charge for meter readings in July 2013.

The adjustments are made based on average resource costs in March 2013– May 2013.

With these adjustments, for meter readings during August of the standard household consuming 32m³(45MJ/ month) in the Tokyo district, etc., the monthly gas tariff will increase by 44 yen (tax included) from that of July (previous month).

1. Supply contract rate

(Application of rate schedule A~F as appropriate for the amount of gas use in the month in question)

	Rate A	Rate B	Rate C	Rate D	Rate E	Rate F
Monthly consumption volume	0 to 20m ³	21 to 80 m ³	81 to 200 m ³	201 to 500 m ³	501 to 800 m ³	over 801 m ³
Basic charge (yen/month)	724.50	1,110.90	1,312.50	1,774.50	6,709.50	12,589.50
Commodity charge(yen/m ³)	167.30	147.98	145.46	143.15	133.28	125.93
<Reference> Commodity charge(yen/m ³) July 2013	165.92	146.60	144.08	141.77	131.90	124.55

2. Effect on a standard customer in residential sector

Monthly consumption volume of 32 cubic meters(45MJ/m ³)	yen/month		
	Charge applied for July 2013	Charge applied for August 2013	Change
Including the national consumption tax	5,802	5,846	44

*The volume of standard household is calculated based on the average of 5years (FY2006-2010) usage per household per month.

3. Fluctuation in gas resource prices

	yen/ton		
	Feb-Apr., 2013	Mar-May.,2013	Difference
Standard average gas resource price (1)	66,180		/
Average gas resource price (2)	81,020	82,610	1,590
LNG	80,780	82,500	1,720
LPG	89,470	87,230	-2,240
Difference (2) - (1)	14,800	16,400	1,600

Note: Both LNG and LPG prices are based on customs clearance statistics.

：“Difference(2)-(1)” are rounded down to the nearest hundred yen

4. Calculation of unit charge adjustment

Calculation of unit charge adjustment for gas resource costs

●Calculation of average gas resource prices

Average LNG price (customs clearance statistics value)	82,500 yen/ton	x 0.9658(*1)
Average LPG price (customs clearance statistics value)	87,230 yen/ton	x 0.0336(*1)
+)		
	82,609.42	
	↓ (rounded to the nearest ten yen)	
	82,610yen/ton	

●Calculation of the amount of gas resource price fluctuation

82,610yen/ton	-	66,180 yen/ton	=	16,430 yen/ton
(omission of amounts less than 100 yen)				
↓				
border: 1px solid black; text-align: center;">16,400 yen/ton				

●Calculation of the adjusted rate (charge per cubic meter)

Adjusted rate= (unit charge)	16,400 yen	/	100 yen	x	0.0861 (*)
=	14.12yen	(rounding down of amounts less than 0.01 yen)			

*:The unit commodity charge is adjusted by 0.0861(0.082×1.05) yen per cubic meter for every 100 yen of fluctuation

* Effect on a standard customer in residential sector

			yen/month
Monthly consumption volume of 32 cubic meters(45MJ/m ³)	Charge applied for July 2013	Charge applied for August 2013	Change
Including the national consumption tax	5,802	5,846	44

*Method of calculation for the standard gas rate in residential sector (including the national consumption tax)

Gas rate (Tokyo district, etc., tax included, rounded down to the nearest yen)

= Basic charge (1,110.90 yen)

+ Commodity charge (133.86 yen + 14.12 yen) x 32m³

↑
Standard commodity charge at
the time of notification of the
tariff revision (tax-included)

↑
Unit commodity charge
(tax-included)

Reference: Outline of the gas resource cost adjustment scheme

- * The scheme provides for adjustment of the unit commodity charge in gas rates (i.e., the charge per cubic meter of gas consumed) every month in correspondence with fluctuation in gas resource prices owing to factors such as exchange rates and crude oil prices.
- * The unit commodity charge is adjusted by 0.0861 yen per cubic meter (0.082 multiplied by 1.05(consumption tax)) for each 100 yen of fluctuation in gas resource price, based on the difference between the standard average gas resource price (66,180 yen per ton) and average gas resource price (calculated on the basis of weighted average cost of LNG and LPG import prices in the previous 3-5 months).
- * The fluctuation in gas resource prices is calculated on the basis of actual values in customs clearance statistics for both LNG and LPG.
- * Arrangement has been made to avoid price hike.
Even if the average gas resource price exceeds the upper limit of 105,890 yen, the amount of 105,890 yen is applied in the calculation of the gas rate adjustment.
