

Gas rates for March 2014
based on fluctuation in gas resource cost and adjustment of gas rates
(Tokyo District, etc.)

Tokyo Gas Co., Ltd.

In accordance with the provisions for gas rate adjustment system, Tokyo Gas has set the unit commodity charge for meter readings in March 2014 upward by 2.47 yen per cubic meter (45MJ, tax included) relative to the corresponding charge for meter readings in February 2014.

The adjustments are made based on average resource costs in October 2013– December 2013.

With these adjustments, for meter readings during March 2014 of the standard household consuming 32m³(45MJ/ month) in the Tokyo district, etc., the monthly gas tariff will increase by 79 yen (tax included) from that of February 2014(previous month).

1. Supply contract rate

(Application of rate schedule A~F as appropriate for the amount of gas use in the month in question)

	Rate A	Rate B	Rate C	Rate D	Rate E	Rate F
Monthly consumption volume	0 to 20m ³	21 to 80 m ³	81 to 200 m ³	201 to 500 m ³	501 to 800 m ³	over 801 m ³
Basic charge (yen/month)	724.50	997.50	1,165.50	2,005.50	6,205.50	12,085.50
Commodity charge(yen/m ³)	160.57	146.92	144.82	140.62	132.22	124.87
<Reference> Commodity charge(yen/m ³) February 2014	158.10	144.45	142.35	138.15	129.75	122.40

2. Effect on a standard customer in residential sector

	yen/month		
Monthly consumption volume of 32 cubic meters(45MJ/m ³)	Charge applied for February 2014	Charge applied for March 2014	Change
Including the national consumption tax	5,619	5,698	79

*The volume of standard household is calculated based on the average of 5years (FY2006-2010) usage per household per month.

3. Fluctuation in gas resource prices

	yen/ton		
	Sep.-Nov., 2013	Oct.-Dec.,2013	Difference
Standard average gas resource price (1)	82,470		/
Average gas resource price (2)	78,840	81,690	2,850
LNG	78,340	81,080	2,740
LPG	88,230	93,270	5,040
Difference (2) - (1)	▲3,600	▲700	2,900

Note: Both LNG and LPG prices are based on customs clearance statistics.

:”Difference(2)-(1)” are rounded down to the nearest hundred yen

4. Calculation of unit charge adjustment

Calculation of unit charge adjustment for gas resource costs

●Calculation of average gas resource prices

Average LNG price (customs clearance statistics value)	81,080 yen/ton	x 0.9545(*1)
Average LPG price (customs clearance statistics value)	93,270yen/ton	x 0.0461(*1)
+)		
<div style="border: 1px solid black; display: inline-block; padding: 2px 10px;">81,690.60</div>		
↓ (rounded to the nearest ten yen)		
<div style="border: 1px solid black; display: inline-block; padding: 2px 10px;">81,690yen/ton</div>		

●Calculation of the amount of gas resource price fluctuation

$$\begin{array}{r}
 \boxed{81,690\text{yen/ton}} - 82,470 \text{ yen/ton} = \boxed{\blacktriangle 780 \text{ yen/ton}} \\
 \text{(omission of amounts less than 100 yen)} \\
 \downarrow \\
 \boxed{\blacktriangle 700 \text{ yen/ton}}
 \end{array}$$

●Calculation of the adjusted rate (charge per cubic meter)

$$\begin{array}{r}
 \text{Adjusted rate} = \boxed{\blacktriangle 700 \text{ yen}} / 100 \text{ yen} \times 0.08505 (*) \\
 \text{(unit charge)} \\
 = \boxed{\blacktriangle 0.60\text{yen}} \quad \text{(rounding up of amounts less than 0.01 yen)}
 \end{array}$$

*:The unit commodity charge is adjusted by 0.08505(0.081×1.05) yen per cubic meter for every 100 yen of fluctuation

* Effect on a standard customer in residential sector

			yen/month
Monthly consumption volume of 32 cubic meters(45MJ/m ³)	Charge applied for February 2014	Charge applied for March 2014	Change
Including the national consumption tax	5,619	5,698	79

*Method of calculation for the standard gas rate in residential sector (including the national consumption tax)

Gas rate (Tokyo district, etc., tax included, rounded down to the nearest yen)

= Basic charge (997.50 yen)

+ Commodity charge (147.52 yen + ▲0.60yen) x 32m³

↑
Standard commodity charge at the time of notification of the tariff revision (tax-included)

↑
Unit commodity charge (tax-included)

Reference: Outline of the gas resource cost adjustment scheme

* The scheme provides for adjustment of the unit commodity charge in gas rates (i.e., the charge per cubic meter of gas consumed) every month in correspondence with fluctuation in gas resource prices owing to factors such as exchange rates and crude oil prices.

* The unit commodity charge is adjusted by 0.08505 yen per cubic meter (0.081 multiplied by 1.05(consumption tax)) for each 100 yen of fluctuation in gas resource price, based on the difference between the standard average gas resource price (82,470 yen per ton) and average gas resource price (calculated on the basis of weighted average cost of LNG and LPG import prices in the previous 3-5 months).

* The fluctuation in gas resource prices is calculated on the basis of actual values in customs clearance statistics for both LNG and LPG.

* Arrangement has been made to avoid price hike.

Even if the average gas resource price exceeds the upper limit of 131,950 yen, the amount of 131,950 yen is applied in the calculation of the gas rate adjustment.
