Completion of Purchase of Shares in Natural Gas Fired Power Plant in Thailand

Tokyo Gas Co., Ltd.
Tokyo Gas Asia Pte. Ltd

Tokyo Gas Co., Ltd. (President: Michiaki Hirose, “Tokyo Gas”) and its 100 % subsidiary Tokyo Gas Asia Pte. Ltd. (Managing Director: Nobuhisa Kobayashi, “TG Asia”) are pleased to announce that TG Asia has completed the acquisition of 28 % interest in Eastern Power and Electric Company Limited (“EPEC”), a company that owns and operates natural gas fired power plant in Thailand, from Total Gas & Power Thailand S.A.S (“Total”). This marks the first achievement for Tokyo Gas to participate in power generation businesses in South East Asia.

It is estimated that the electricity market in Thailand will keep growing of 3% per year reflecting the stable economic development of Thailand. In particular, natural gas fired power plant occupies 60% of total power supply in Thailand and is considered to be a major energy source for the power development plan of Thailand.

EPEC’s power plant, called “Bang Bo Power Plant,” is located in approximately 50km to the east of Bangkok, the capital of the Kingdom of Thailand, and it has been steadily operating since its Commercial Operation Date in 2003. The full generating capacity of the plant is contracted to the Electricity Generating Authority of Thailand under long-term power purchase agreements, which is expected to ascertain stable income over the long run.

Tokyo Gas Group, while taking advantage of its long standing technology and know-hows relating to energy infrastructure development, will continue to expand its overseas business under “Challenge 2020 Vision” initiative. With regional focus on South East Asia and North America, it intends to be competitive across the entire LNG value chain by taking measures such as formation of alliances with local energy companies.

< Overview of Bang Bo Power Plant >

Company Name	Bang Bo Power Plant
Location	Amphoe Bang Bo, Samut Prakan, Thailand
Capacity	350MW
Type	Combined Cycle Gas Turbine
Fuel	Natural Gas
Commercial Operation Date	March, 2003
