

4 Challenge 1: Leadership in the effort to achieve Net-Zero CO₂

- In its overall business activities, the Tokyo Gas Group will **work to achieve Net-Zero CO₂ emissions** including customer emissions and **lead the transition to a decarbonized society**.
- We will use **technologies and expertise for the effective use of natural gas** to promote decarbonization in the electricity and heat sectors as well as for CO₂ capture technologies.
- We will **contribute to reduce carbon emissions on the scale of 10 million tons** by 2030 (which exceeds Japan's target ratio*) and lead the way to reducing CO₂ emissions on a global scale.

<Efforts to achieve Net-Zero CO₂ in the Tokyo Gas Group's style>

* Japan's reduction target ratio: The greenhouse gas reduction target in the Intended Nationally Determined Contribution submitted to the United Nations (26% reduction in FY 2030 as compared to FY 2013).

** CCUS: Carbon Capture, Utilization, and Storage
