Compass Transformation 23-25

Tokyo Gas Group Medium-term Management Plan for FY2023-2025

(announced February 22, 2023)

Executive Summary

- We, the Tokyo Gas Group, are positioning FY2023-2025 as a time to transform our business model into one that contributes to a sustainable society and provides value to customers through solutions and businesses that go beyond our traditional focus on energy. To do this, we will execute three core strategies that center on green transformation (GX), digital transformation (DX), and customer experience (CX).
- As we implement our strategies, we will swiftly and flexibly address energy market volatility and uncertainties by strengthening our business portfolio management in terms of profitability, growth potential, and stability, and by accelerating the shift of management resources to new growth areas.

■ The 3 Core Strategies for FY2023-2025

(1) Achieve both stable energy supply & decarbonization

Commercialize and monetize the business in decarbonization area, while continuing to stably supply energy

Leveraging value chain flexibility to address market volatility and maintain stable supply

We will respond to the increased volatility of energy markets through <u>asset formation/operation</u> <u>aligned with markets promising new growth (balancing capacity, environmental value, etc.).</u>
 We will also <u>construct a digital trading platform that will better enable us to provide a stable, environmentally responsible, and flexible supply of energy that serves customer needs.
</u>

Responsibly leading the transition

• While promoting the sophisticated use of LNG in Japan and overseas as a means of reducing CO₂ emissions, we will use the resulting earnings to invest in advanced fields of decarbonization—renewable energy (especially offshore wind power and other expansive markets), e-methane, hydrogen, and more—and progressively turn those investments into businesses. We will also support both the decarbonization and economic growth of society by establishing a virtuous circle of sustainable growth for our customers and our Group whereby we strive not only to reduce our own emissions but also provide customers with optimal solutions tailored to their needs.

Developing technologies for decarbonizing gas & electricity

We will proactively decarbonize the biggest area of energy demand—heat supply—by
 strengthening and expanding our e-methane initiatives, progressing from small-scale
 demonstration tests to the construction of a large-scale supply chain. In the electric power market, we will implement not only solar/biomass power initiatives, but also projects for increasing scale and lowering costs in offshore wind power, working together with the national government to achieve Japan's GX at an early stage.

(2) Fully roll out Solutions business

Develop Solution business as a center next to Energy business, by integrating solutions which incorporate GX & DX

Building an integrated business brand & expand lineup of solutions

• Redefining the value we provide customers as resilience, optimization, and decarbonization, we will build a new brand that integrates solutions offering that value, and we will provide our residential, corporate, and community customers with a lineup of solutions they can easily understand and use.

Strengthening customer communication through our strengths in face-to-face engagement and through digital technologies

• We will <u>strengthen customer communication using advanced digital technologies</u> supplied by Octopus Energy, etc., with the aim of <u>further consolidating the customer relationships we have built up through face-to-face engagement</u>.

Co-creating value with communities by providing them with optimized solutions that leverage our strong root in the community

• We will help customers and communities to overcome the challenges they face by providing them with optimized combinations of all sorts of environmental solutions (ranging from energy conservation to advanced decarbonization technology) that we and our alliance partners have to offer. In addition, we will support the realization of sustainable communities by promoting ESG-oriented real estate development and urban development with a growing range of solutions, service areas, and business fields.

(3) Realize a flexible corporate culture resilient to change

Increase resilience to uncertainty by transforming our business model through DX, in addition to exercising human capital management and implementing financial strategy.

Implementing 3 key DX actions

• We will implement 3 key DX actions for evolving our systems and work processes in ways that leverage the advantages of digital technologies and incorporate insights from pioneering businesses. Action 1: Construct a digital trading platform that will become a future source of revenue, targeting new markets that promise to grow with the shift to renewables as the dominant source of electric power (e.g., balancing capacity and environmental value markets). Action 2: Significantly enhance customer experience (CX) through integration of our customer management system platform. Action 3: Radically overhaul our back-office operations to double their productivity.

Exercising human capital management

• We will take a strategic approach to talent recruitment, placement, training, and reskilling, and develop systems that enable diverse talent to play active roles across our Group with the aim of enabling our internal companies and key business subsidiaries to carry out impactful work in their respective markets and increase their earning power. Through these actions, we will exercise

human capital management in ways that <u>provide a real sense of our growth, both as individuals</u> <u>and as a Group</u>.

Strengthening our financial base

• We will strengthen our business portfolio management <u>to pursue growth investments while</u>

<u>maintaining financial soundness</u>, and to realize sustainable growth and improvement of our

<u>enterprise value</u>.

■KPIs

Financial & Environmental Indicators		Now (FY2020-22 average)	FY2025
Financial	Segment profits*1 (operating profit + equity income of subsidiaries)	130 bn yen	150 bn yen
	ROA*1	3.0%	approx. 4%
	ROE*1	7.3%	approx. 8%
	D/E ratio	0.91	approx. 0.9
Environmental	CO2 reduction contribution	6 mn tons*2	12 mn tons*3

Cash Flow & Investment Plan		FY2020-22 (estimated)	FY2023-25
Cumulative operating cash flow (Profit attributable to owners of parent + depreciation)		960 bn yen	1,100 bn yen
Investments	Growth investments (portion for decarbonization-related investments)	530 bn yen (190 bn yen)	650 bn yen (230 bn yen)
	Infrastructure investments	370 bn yen	350 bn yen
	Total (3 years)	900 bn yen	1,000 bn yen

Compass Transformation 23-25

Tokyo Gas Group Medium-term Management Plan for FY2023-2025

February 22, 2023

- 1. Introduction
- 2. Current Environment & Our Accomplishments
- 3. Overview of Compass Transformation 23-25
 The 3 core strategies for FY2023-2025
 Business portfolio management
- 4. Concrete Actions for the 3 Core Strategies
 - (1) Achieve both stable energy supply & decarbonization
 - (2) Fully roll out Solutions business
 - (3) Realize a flexible corporate culture resilient to change
- 5. KPIs & Investment Plan

1. Introduction

1. Introduction — Positioning of FY2023-2025 —

Actions for FY2023-25

- We will responsibly lead the transition to a decarbonized society by progressively launching new businesses for renewable energy (offshore wind power, etc.), e-methane*, hydrogen, etc., while maintaining the stable supply of energy.
- We will lay the foundation for the full rollout of our Solutions business by accelerating the Group-wide implementation of digital transformation initiatives in collaboration with pioneering companies, and building a platform that fuses strengths in face-to-face engagement and digital technologies.
- We will establish a flexible corporate culture that is resilient to change by strengthening the competitiveness of the internal companies and major business subsidiaries under our holdings-type group structure, and exercising human capital management in ways that provide a real sense of our growth, both as individuals and as a Group.

Group's Management Philosophy

Standing by every person and dedicating ourselves to the society, we shall be the energy that weaves the future

Key sustainability issues (material issues) we will tackle through our business activities

Society and Customers

- Responsibly transitioning to a decarbonized society
- Protecting the global environment

- Securing stable energy supply
- Enhancing safety & disaster prevention, resilient regional development
- Contributing to well-being of people and communities

Tokyo Gas Group (Us)

- Realizing an organization that embraces diverse talent
- Respecting human rights across the entire value chain

2020-2022

Launched 3 challenges

Formulated new Group's Management Policy

Transitioned to company with nominating committee & holdings-type group structure

2023-2025

Transform our business model into one that drives society's sustainable growth and provides even greater value to customers through solutions and businesses that go beyond our traditional focus on energy

2030

Lead transition to Net-zero CO2 Establish a value co-creation ecosystem

Transform the LNG value chain

Profits of approx. 200 bn yen

Methane synthesized from non-fossil fuel energy raw materials (green hydrogen, etc.

2. The Current Environment & Our Accomplishments

External Environment

Growing geopolitical risks & greater market sophistication

Increased demand for decarbonization & sustainability

Tremendous evolution of digital technologies

The new normal & changes in values

2020-22 medium-term plan accomplishments

FY2022 KGI: Profits are expected to exceed goal of 140 bn yen

Remaining challenges

3 core strategies for FY2023-25

Society

1 Lead transition to Net-zero CO2

- Actively invested in renewables in Japan & abroad
- Expanded carbon-neutral LNG*1

ustomers

2 Establish a value co-creation ecosystem

- Partner with Octopus Energy
- Expanded decentralized energy systems & smart city development

3 Transform the LNG value chain

- ◆ Transitioned to holdings-type group structure
- Launched new LNG trading company & new services (last-mile, etc.)

- Achieve green transformation (GX) while maintaining stable energy procurement & supply
- Strengthen customer experience (CX) by accelerating digital transformation (DX)
- Establish new business (Solutions) to join energy businesses (gas & electricity)
- Strengthen human capital by introducing HR system aligned with holdings-type group structure, and drive structural reforms with digital tools (DX)

Achieve both stable energy supply & decarbonization

Actively commit resources to GX (renewables, e-methane, etc.) while maximizing the diverse value of LNG

2 Fully roll out Solutions business

Use digital technologies to expand Solutions business on our platform of real-world strengths, and establish a revenue model

Realize a flexible corporate culture resilient to change

Use digital technologies to reform back-office operations

Exercise human capital management

3. Overview of Compass Transformation 23-25

3. The 3 core strategies for FY2023-2025

Positioning of FY2023-2025

3 core

strategies for

FY2023-2025

Transform our business model into one that drives society's sustainable growth and provides even greater value to customers through solutions and businesses that go beyond our traditional focus on energy

Commercialize and monetize the businesses in decarbonization area, while continuing to stably supply energy in the face of uncertainties surrounding energy.

Specific Actions

1. Basic stance on achieving both stable energy supply and decarbonization (p. 11)

- 2. Value creation that leverages flexibility across the value chain (p. 12)
- 3. Create a cycle of low-carbon/decarbonization actions and business growth through a responsible transition (p. 13)
- 4. Sophisticated use of natural gas and decarbonization of gas/electricity (p. 14)
- 5. Increase sophistication and resilience of supply network (p. 15)
- Strengthen revenue base & contribute to decarbonization overseas (p. 16)

Fully roll out Solutions business

Develop Solution business as a center next to Energy business, by integrating solutions which incorporate GX & DX and by enhancing solutions that contribute to resolve issues faced by residential, corporate and community customers.

- 1. Develop business brand (p. 18)
- **Specific** 2. Enhance residential solutions to serve diverse customer needs (p. 19)
- Actions 3. Enhance corporate customer solutions for the era of decarbonization & decentralization (p. 20)
- 4. Expand community solutions through co-creation (p. 21)
- 5. Engage in ESG-oriented real estate development (p. 22)

Realize a flexible corporate culture resilient to change

Increase resilience to market volatility and uncertainty by transforming our business model and improving productivity through DX, in addition to exercising human capital management and implementing financial strategy.

Specific

- 1. Advance DX in ways that enhance value provided (p. 24)
- 2. Implement back-office operation reforms & CRE strategy (p. 25)
- 3. Improve value of human capital (p. 26)

- 4. Enhance sustainability management (p. 27)
- 5. Implement financial strategy (p. 28)

Actions

Copyright@ TOKYO GAS Co., Ltd. All Rights Reserved

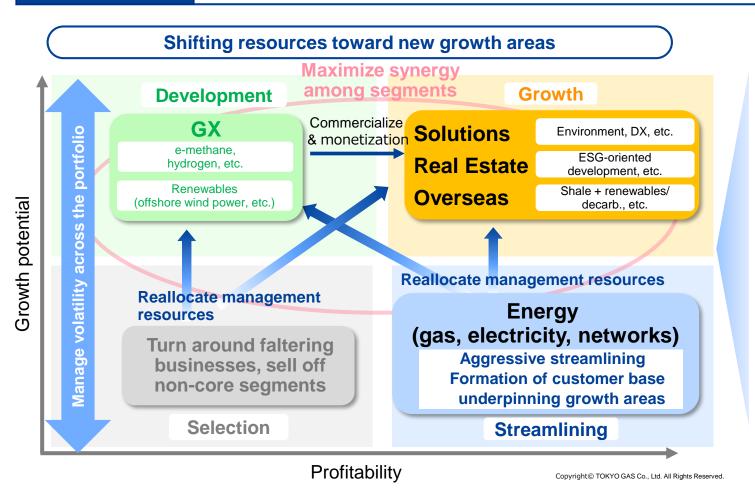

3. Business portfolio management

Basic policy for business portfolio management

As part of execution of the three core strategies, strengthen business portfolio management, with emphasis on:

- (1) profitability, (2) growth potential, and (3) stability
- (1) Profitability: Use DX, back-office operation reforms, etc. to maximize cash flows created from core energy business
- (2) Growth potential: Use those cash flows to actively invest in the new growth areas of GX, solutions, etc.
- (3) Stability: Ensure business stability across the Group even amid uncertainties that increase energy market volatility by developing multiple businesses with different risk/return profiles under the holdings-type group structure

Portfolio management initiatives

1 ze lin

Maximize links & synergy among established segments

- Address market volatility with integrated approach to supply/demand
- Strengthen inter-segment collaboration in Japan and abroad
- Provide solutions combining diverse products and applications, and engage in ESG-oriented real estate development

2

Achieve mediumand long-term growth

 Answer society's growing demand for decarbonization by investing in renewables & methanation, and by expanding decentralized solutions

3

Business exit & divestment guided by best owner perspective

 Drive the reallocation of resources through process of selection (identify core vs. non-core segments, analyze life cycles)

4. Concrete Actions for the 3 Core Strategies

1 Achieve both stable energy supply & decarbonization

1-1. Basic stance on achieving both stable energy supply and decarbonization

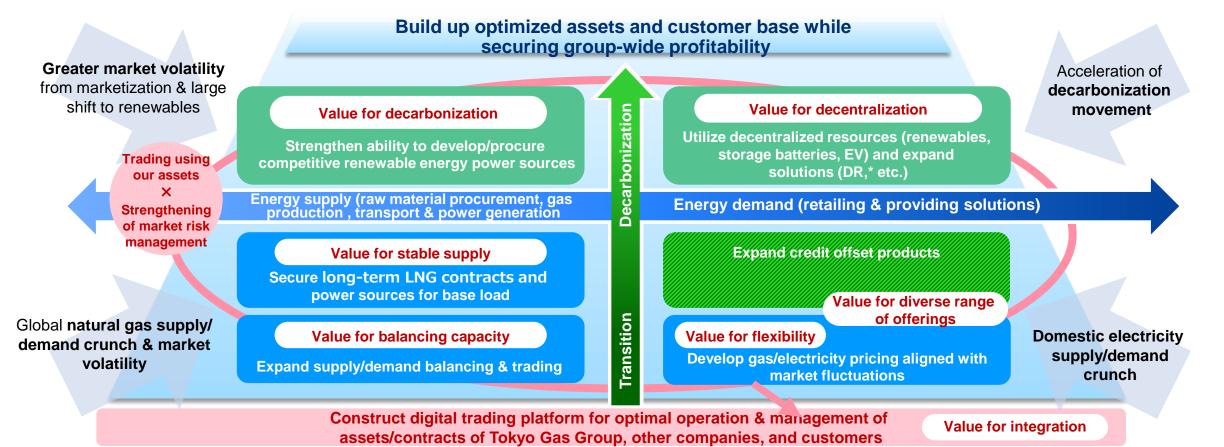

Tokyo Gas Group will create a new model for stable energy supply

Focuses

■Transform: Realize stable energy supply and advance decarbonization of both gas and electricity by taking sensible action as a very reliable energy supplier and by controlling the impact of energy market volatility through approaches that integrate supply & demand and integrate customers and society

■Value:

Expand customer base and supply optimally while securing profitability across the Group through the provision of solutions that are tailored to customer needs and combine the different forms of value offered by LNG and renewables

1-2. Value creation that leverages flexibility across the value chain TTOKYO GAS GROUP

Support stable energy supply by developing sophisticated AO&T & constructing a digital trading platform

Focuses

■Transform:

Address market volatility by leveraging the flexibility of our assets across the entire value chain

■Value:

Realize optimal proposals that meet customer needs through solutions that combine our strengths in supplying and balancing gas, electricity, and environmental value with customer demand/decentralized resources (development of solutions from energy supply and purchasing options)

What we've done

Actions for FY2023-25

Where we want to be in 2025

Laid AO&T* groundwork

Commenced optimal operation of LNG/electricity procurement, supply, and trading in ways leveraging our LNG assets

- Built platform centered on Singapore & Tokyo for LNG trading in East Asia & Pacific region
- Launched LNG trading with North America, Europe, and the Pacific through collaboration with European alliance partner
- *Asset Optimization & Trading: Integrated approach to optimal operation of facilities and trading

Increase sophistication of AO&T

Risk management & flexible asset utilization across the value chain

- Integrated management across the value chain of market risk and the option value of our LNG/electricity assets (capacity, flexibility, value added)
- Stably supply competitive energy through dynamic response to risks & opportunities (expanded range of energy solutions tailored to market conditions)

Expand LNG/electricity trading and increase sophistication

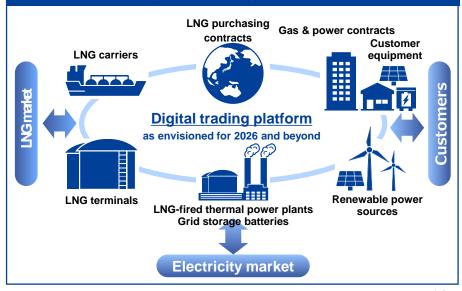

- Strengthen LNG trading in European/Pacific markets, combine financial products and our assets, and engage in sophisticated asset operation using digital technology
- Diversify trading by entering the electricity supply/demand balancing market

New energy trading approaches driven by digital tech

Develop digital trading platform & expand product lineup

- Build a system that fuses the AO&T insights we have amassed with Octopus Energy's technologies
- Step up acquisition of decentralized resources (including grid storage batteries and renewable energy plant storage batteries) and expand lineup of decarbonization products/solutions

- DX-enhanced asset utilization, and expanded lineup of energy solutions
- Stronger market intelligence spanning Pacific and Atlantic, and expanded use of LNG trading
- Electricity digital trading platform in place

1-3. Create a cycle of low-carbon/decarbonization actions and business growth through a responsible transition

Provide solutions and develop advanced technologies to

establish a virtuous circle of low-carbon/decarbonization actions and growth

■Transform: While maintaining our commitment to stable energy supply, establish a cycle for continuing to provide environmental

value to customers by creating a cycle between best available technologies/solutions and development of advanced

technologies

■Value: Contribute to CO2 emission reductions across society and achieve growth for both our customers and our Group

*Carbon capture and utilization

Focuses

Reduce CO2 emissions across society

Maintain our commitment to stable energy supply

1-4. Sophisticated use of natural gas and decarbonization of gas/electricity

Leverage gas/electricity value chains to responsibly lead the transition

Focuses

■Transform: Further increase use of carbon-neutral LNG (CNL), and advance green transformation (GX) by establishing overseas supply chain toward real-world deployment of e-methane and by expanding the renewable energy base

■Value:

While continuing to stably supply energy and striving to reduce CO2 emissions through sophisticated use of natural

gas, promote to decarbonize gas/electricity, and progressively turn expertise of our own emissions reduction into

solutions to contribute to customers

What we've done

Actions for FY2023-25

Where we want to be in 2025

Sophisticated use of natural gas

Expanded use of CNL

Decarbonization of gas

- Conducted small-scale methanation demonstration testing
- Developed innovative methane production technology
- Developed low-cost water electrolysis cell stack

Decarbonization of electricity

Expanded renewable power sources through development & acquisition (renewable power source transaction volume*1: 1.49 mn kW)

Reduction of our emissions

Began working to achieve net-zero emissions of CO2 from our activities*2 (achieved 18% of our net-zero target)

Expand solutions, including carbon credit-based CNL, etc.

Launch organization for advancing decarbonization solutions (GX company)

- Establish large-scale e-methane supply chain
- Build large-scale e-methane supply chain overseas (US, etc.) (technology development, compliance with environmental value, raw material procurement)
- Develop practical low-cost water electrolysis cell stack for production of hydrogen
- Acquire renewable power sources toward acquisition of new revenue sources
- ✓ Steadily expand renewable power sources
 ✓ Accelerate efforts for early real-world deployment of floating offshore wind power
- Study methods for achieving net-zero CO2 emissions from our thermal power plants
- Achieve net-zero CO2 emissions from city gas production facilities
- Implement countermeasures for methane emissions in shale development

- Final investment target decision for building large-scale e-methane supply chain overseas
- Renewable power source transaction volume: 2.2 mn kW
- Net-zero CO2 from our activities: **Reach 60%** (vs. FY2020)
- CO2 reduction contribution: 12 mn t

2030 goals

- e-methane deployment of 1% (80 mn Nm³/year)
- Renewable power source transaction volume: 6 mn kW
- Net-zero CO2 in our activities
- CO2 reduction contribution: 17 mn t

^{*1} Total from our assets (including projects targeted for investment), external suppliers, etc.

^{*2} CO2 emitted from city gas production facilities, buildings, etc. we use, and company vehicles. Target is based on FY2020

1-5. Increase sophistication and resilience of supply network

Pursue DX and collaborations to enhance infrastructure resilience and provide value

Focuses

■Transform:

Provide better value to communities by increasing sophistication of network operations through DX, securely

acquiring city gas demand, further strengthening resilience, and collaborating with infrastructure operators, etc.

■Value:

Increase the sophistication of gaseous energy infrastructure operation to enhance safety, security, and reliability,

and contribute to carbon neutrality

What we've done

Launched Tokyo Gas Network

TGN, sharing the same Tokyo Gas Group brand of "safety, security, and reliability," took over Tokyo Gas' duties of expanding city gas use, ensuring safety, and stably supplying gas.

Expanded use of city gas

- Firmly contributed to low-carbon measures
- Actively developed city gas customers

Ensured safety & stable supply

 Serviced and replaced supply infrastructure to improve supply stability, transport capability, and safety

Actions for FY2023-25

DX for greater sophistication in network operations and greater value provided

- Install smart meters to enhance safety and resilience
- Pursue **DX to improve operations and realize smart safety**

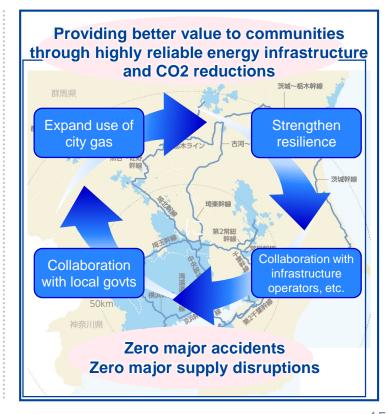

Further contribute to responsible transition

- Reduce CO2 emissions by expanding the use of city gas, including investment in pipelines (contribution to carbon neutrality)
- Further collaborate with local governments to increase value of city gas

Strengthen collaboration with infrastructure operators & retailers

 Collaborate with electricity/communication infrastructure operators and retailers to share/utilize infrastructure data for greater operational efficiency and stronger disaster response capabilities

Where we want to be in 2025

Copyright@ TOKYO GAS Co., Ltd. All Rights Reserved.

1-6. Strengthen revenue base & contribute to decarbonization overseas

Linking businesses to realize community-based energy supply

Focuses

■Transform: Replace assets and pursue inter-business collaborations. Accelerate investment in future revenue sources

and broaden range of revenue base.

■Value:

Contribute to community growth and decarbonization by implementing energy businesses tailored to each

market

What we've done

Actions for FY2023-25

Where we want to be in 2025

- Structured portfolio so that more than half is made up by LNG upstream assets in Australia
- Focused on investment in individual assets, while also investing in operating companies

■ Aktina Solar Project in North America

Core business development & growth

Expand revenue with interbusiness links

North America	 Acquire additional assets and operating companies in shale gas, renewables, etc. Move into decarbonization sector (renewable gas) and related businesses (energy services, etc.) Acquire & enhance functions linking businesses (marketing, trading, etc.)
SE Asia	 Launch operation of LNG infrastructure projects Enter renewable energy market
Aust./ Europe	Expand businesses in decarbonization, etc., including renewable energy
Business base	 Strengthen development capabilities by acquiring operating companies, expand recruitment of local talent Improve profitability through asset replacement, etc.

Evolve to a stable revenue base Drive profits with shale gas business, while also boosting revenue through renewable energy and other decarbonization businesses Decarbonization. incl. renewables Shale gas **LNG** infrastructure, etc. Shift to locally developed organization/talent

Copyright@ TOKYO GAS Co., Ltd. All Rights Reserved

4. Concrete Actions for the 3 Core Strategies

2 Fully roll out Solutions business

2-1. Develop business brand

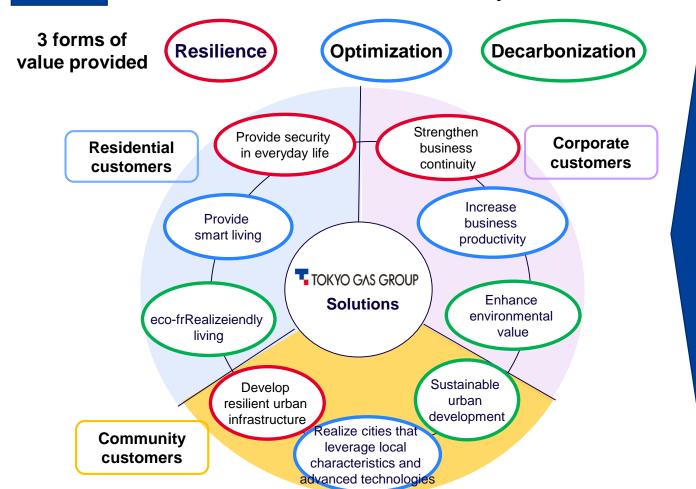

Increase profile & customer value by building an integrated brand in Solutions

Focuses

■Transform: Build an integrated brand in Solutions that redefines the value we provide as resilience, optimization, and

decarbonization

■Value: Provide customers with clearly structured solutions under the integrated business brand

Underpinning corporate values:

Safety, Security & Reliability

Concepts

Residential customers

Provide optimal solutions aligned with their life stages and changes in society

Corporate customers

Contribute to their continued growth by combining our expertise with theirs

Community customers

Energize communities through co-creation with stakeholders

Build up concrete solutions, and expand the solutions ecosystem by leveraging our digital technology platform and by co-creating and partnering with other companies

2-2. Enhance residential solutions to serve diverse customer needs

Serve residential customers by creating and providing value through diverse connections

Focuses

■Transform: Shift to a model aligned with the changes in customers' lifestyles and energy use that are being driven by

population aging/shrinking, digital transformation, decentralization, etc.

■Value:

Provide solutions that fuse digital technologies and face-to-face engagement and are personalized to customer

needs

What we've done

Energy supply

- Expanded customer base with co-creation partners
- Launched Sasutena Denki & other new electricity plans

Expansion of products/services

- Began offering products/solutions for PV, storage batteries, etc.
- Rolled out repair & home support services that leverage our lastmile strengths

Platform for value provision

Redesigned platform for customer reception/management

Actions for FY2023-25

Achieve real growth in energy business

Build system of rate plans and services tailored to diverse customer needs

Turn energy & environmental equipment into solutions

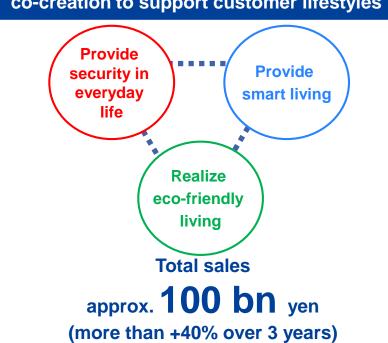

■ Leverage decentralized resources (PV, storage batteries, EV) to build up solutions (demand response, etc.) through alliances with diverse players

Implement personalized digital marketing that capitalizes on our strengths in face-to-face engagement

- Leverage digital technology platform to expand interactive communication with customers, by shifting to highly responsive customer-centric processes/systems and optimizing approaches based on data on customer traits/behavior
- Strengthen customer relationships through solutions that capitalize on our last-mile capabilities, and leverage TG Octopus Energy's digital technologies to create more connections (customer accounts)

Where we want to be in 2025

Expand internal/external partnerships and co-creation to support customer lifestyles

Copyright@ TOKYO GAS Co., Ltd. All Rights Reserved.

2-3. Enhance corporate customer solutions for the era of decarbonization & decentralization

Provide decarbonization-centered solutions to solve the management challenges of customers nationwide

Focuses

■Transform: Become a co-creation partner in business transformation for customers by consolidating corporate sales functions at Tokyo Gas Engineering Solutions (TGES) and strengthening nationwide implementation of solutions sales in addition to energy supply

■Value:

Help customers to improve environmental value (decarbonization), strengthen business continuity, and enhance business productivity

What we've done

Actions for FY2023-25

Where we want to be in 2025

Energy supply

- Expanded supply of city gas, LNG, and electricity in mainly the Tokyo metropolitan area
- Became first in Japan to introduce carbon-neutral LNG

Provision of solutions

Provided engineering solutions that capitalize on our user knowhow

Sales organization realignment

Corporate sales functions were consolidated at TGES

Enhancement and nationwide deployment of decarbonization solutions

- Provide continuous, effective solutions, including in environmental consulting, EPC/energy services, and O&M
- Enhance/provide decarbonization products and link them with certification
 - (Provide customer-tailored renewable energy [Solar Advance, biomass, geothermal, etc.] and carbon credit offsetting products)
- Promote large projects combining energy supply and decarbonization solutions (co-creation for decarbonization at Narita Airport)

Sophisticated decentralized energy networks

- Help customers to improve the value added of their equipment and optimize energy management (VPP,*1 demand response, storage batteries, CPPA,*2 corporate EV services, etc.)
- Ensure stable energy procurement/supply, expand range of solutions aligned with market conditions

Develop/deploy data-driven solutions

Expand new solutions that help to streamline work processes and save labor (Helionet Advance, O&M-DX, Joy series, *3 facility management, etc.)

2-4. Expand community solutions through co-creation

Pursue urban development initiatives for achieving carbon neutrality to solve community challenges

Focuses

■Transform: Leverage our strong roots in the community to expand environmental/digital/educational solutions that bring out

the city's vitality

■Value:

Co-create with local governments/businesses and experts to help realize secure, pleasant, and sustainable

communities

What we've done

Actions for FY2023-25

Where we want to be in 2025

Expansion of community collaboration

- Entered into comprehensive agreements for carbonneutral urban development with local governments and city gas suppliers
- Established new community electric power company (Utsunomiya Light & Power)

Provision of solutions

Contributed to urban development with Smart Energy Network (Tamachi, Yaesu Smart Energy)

Promotion of alliances

Collaborated with local companies and other industries

Expand solutions

Enhance/provide environmental products/solutions that are competitive (CNL, Joy series, demand response, EV services, environmental education programs, commercial fuel cells, etc.)

Expand service area

Expand service area based on experience in working with local governments, etc.

- Co-develop solutions with local companies
- Collaborate and share insights with academia/NPOs
- Construct marketing system Group-wide

Increase resilience/efficiency of communitysupporting energy systems

- Introduce advanced energy-saving technologies and unused/renewable energy
- Provide electricity supply/demand balancing functions, and supply heat/power during disasters

Partner that helps communities/local governments to advance decarbonization measures Sustainable urban development Launch community support services in at least ten areas Realize cities that **Develop resilient** leverage local characteristics and urban infrastructure advanced technologies Leverage our strong roots in each community to provide the best solutions to local needs

Copyright@ TOKYO GAS Co., Ltd. All Rights Reserved.

2-5. Engage in ESG-oriented real estate development

Provide security, comfort & environmental harmony by engaging in ESG-oriented real estate development

Focuses

■Transform: Strengthen competitiveness by stepping up ESG-oriented development, and realize stable growth and improved

earnings/efficiency by establishing a circular development model and expanding range of development

■Value:

Contribute to sustainable urban development by developing real estate that provides high levels of resilience,

comfort, and eco-friendliness

What we've done

Achieved stable growth with a development model focused on long-term properties

Achieved stable growth by developing long-term properties (mainly offices/residences, which offer stability) on land we own

■ Established/operated LATIERRA urban rental residence:

Developed large-scale

Actions for FY2023-25

Engage in ESG-oriented development

- Enhance eco-friendliness of properties
- Provide decarbonization solutions
- Strengthen BCP support and environmental/disaster prevention functions
- Acquire sustainability certification and make nonfinancial disclosures

Establish circular development model

- Establish a real estate fund under concept of providing **ESG** value
- Establish circular development model that includes our developed properties in the fund, and accelerate ESG-oriented development
- Achieve both business growth and greater efficiencies

Expand range of development

- Launch development of our Group-led "circular future city" in Shin-Toyosu
- Join in ESG-oriented development project in Australia, a leader in ESGoriented development
- Expand asset holdings to include distribution facilities etc.

Where we want to be in 2025

Contribute to sustainable urban development and co-create value with investors, using ESG-oriented development as a growth engine

More than 10% profit growth over 3 years

Real estate fund size: 40 bn yen

Launch large-scale development in Shin-Toyosu

■ Conceptual image of Shin-Toyosu development

4. Concrete Actions for the 3 Core Strategies

3 Realize a flexible corporate culture resilient to change

3-1. Advance DX in ways that enhance value provided

Leverage digital technology & reform organizational culture to achieve our transformation

Focuses

■Transform:

Develop a data/digital technology platform underpinning DX, increase our pool of DX talent by stepping up recruitment of external talent and actively investing in training, and establish a DX promotion committee to lead our

DX efforts

■Value:

Implement focused DX actions (3 pillars) to realize a lean corporate culture that continuously provides value to

customers and is resilient to change

What we've done

Implemented DX measures in each value chain function

Focused actions

Data/digital technology platform

 Built an integrated platform for Group-wide data analysis

Talent & organization

- Established Digital Innovation Division to lead Group-wide DX
- Systematized DX talent training (800 DX leaders)

Actions for FY2023-25

- 3 DX pillars: Implement actions that make heavy use of digital tools and strongly drive transformation
- (1) Construct digital trading platform that helps to achieve both supply/demand balancing and profit creation
- (2) Improve CX by integrating and standardizing customer management system platform
- (3) Improve productivity by standardizing/consolidating back-office operations and visualizing work processes/performance

Develop data/digital technology platform

- Strengthen data platform for value co-creation through internal/external data coordination and for Al-enhanced sophisticated processing
- Build digital technology platform for supporting implementation of focused DX actions (use Octopus Energy's technologies)

Increase pool of DX talent and strengthen inter-organization coordination through DX promotion committee

- Enhance DX training that emphasizes practical expertise and actively invest in training
- Increase recruitment of high-level DX talent and develop career paths
- Establish DX promotion committee chaired by CDO

Where we want to be in 2025

Enable continuous provision of value to customers by improving digital technology capabilities across the entire value chain

- Begin operating data/digital technology platform
- DX leaders: 3,000 High-level/core DX talent: 500

Realize a highly agile corporate culture

3-2. Implement back-office operation reforms & CRE strategy

*Corporate real estate

Improve earning power through Group-wide action for standardizing/consolidating back-office operations and implementing CRE strategy

■Transform: Improve efficiency and strengthen governance through Group-wide actions such as standardizing/consolidating

back-office operations and optimizing use of CRE* **■Value:**

Use digital technologies to visualize work processes/performance for greater efficiency

Improve earning power and management agility by lowering fixed (indirect) costs through reduction of back-office

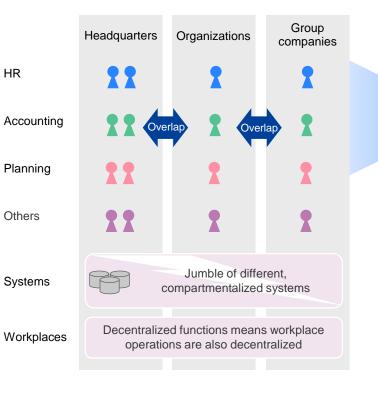

operations

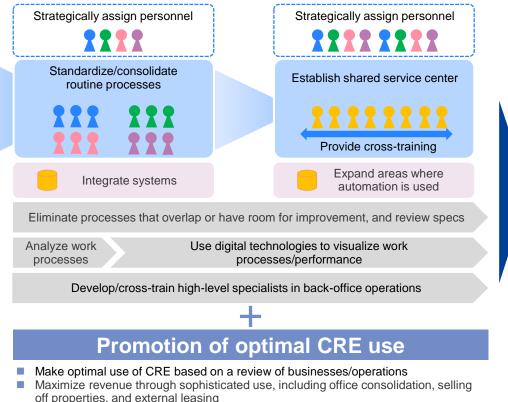

Current state

Focuses

Actions for FY2023-25

Where we want to be in 2025

Improve management agility & earning power **Double** productivity Reduce back-office operations by 40-50% **Personnel** Stronger assigned to governance growth areas Flexibility in **Business** continuity is organizational realignment ensured 25

3-3. Improve value of human capital

Achieve growth both as individuals and as a Group by exercising human capital management

Focuses

■Transform: Acquire and place talent in ways aligned with the management strategy, develop platform for utilizing diverse talent, and expand opportunities for employees to take on challenges and grow as individuals

■Value:

Grow as a group of people who take initiative, respect the diverse opinions and personalities of one another, and continuously take on challenges

3 Promises (Compass 2030)

Actions for FY2023-25

Where we want to be in 2025

We will produce work that will have a major impact on society

Strategic talent placement Strengthen ability to address talent shifts and business changes

- Alignment of HR planning, optimal placement, and reskilling (skills/competencies for contributing to DX and business development in decarbonization, overseas operations, etc.) with management strategy
- Acquisition of high-level specialists and talent system development. including through M&A

We will create a venue for encounters with diversity and friendly competition

Turning diversity into a strength

Knowledge/experience diversity, equity, and inclusion*1

- Promote utilization of women and young employees (increase placement in positions of responsibility, promote childcare leave for men, use femtech*2 to enhance understanding) and workstyles not constrained by time/place
- Actively recruit experienced people globally and increase their placement in positions of responsibility

We will emphasize the self-fulfillment of each person

Growing by taking on challenges

Promote professional talent growth/challenge-taking and self-led career formation

- Provide opportunities to build career/skills in ways reflecting employee aptitude and will, using talent management systems and data
- Encourage employees to personally explore opportunities by promoting/expanding side jobs, internal recruitment, and internal entrepreneurialism

*1 A culture where diverse people can exercise their talents to the fullest, respect one another, and engage in friendly rivalry, leading to the creation of new value. *2 A set of tools for helping women to deal with female health challenges (menstruation

Promoting self-learning

Reskilling/retraining participation rate: 100%*3

Promoting childcare leave taking by men & utilization of women

Men's childcare leave-taking (1 mth) rate: 100% (double in 3 years)*4 Steadily increase female representation in management (at least +15% over 3 years)

Improving engagement

Regularly measure engagement indicators and reflect results in improvement measures

*3 Rate of participation in training and certification programs, etc. for acquiring/refreshing skills (including reskilling). *4 The estimated rate of childcare leave-taking by eligible men (excluding special leave) for FY2022 is approx. 50%.

3-4. Enhance sustainability management

Focusing management to realize a sustainable society through our business value chain

Focuses

Critical

Society's impacts on us

■Transform: Redefine our set of material issues by reviewing the important social issues that need to be addressed, based on the impacts that society and our Group have on each other; manage the material issues based on indicators

■Value:

Analyze their materiality

Take on the challenge of solving social issues through our business activities, and actively discuss with our

stakeholders

Material issues

Actions for FY2023-25

Where we want to be in 2025

Society/Customers

- 1. Responsibly transitioning to a decarbonized society
- 2. Protecting the global environment
- Securing stable energy supply
- 4. Enhancing safety & disaster prevention, resilient regional development
- 5. Contributing to well-being of people and communities

Tokyo Gas Group (Us)

- 6. Realizing an organization that embraces diverse talent
- 7. Respecting human rights across the entire value chain

*A long list of issues will be formulated with reference to international standards/guidelines (such as GRI standards), etc. Strengthening of governance will be positioned as a prerequisite for materiality initiatives.

- Execute the 3 core strategies
- Achieve both stable energy supply & decarbonization
- **Fully roll out Solutions** business
- Realize a flexible corporate 3 culture resilient to change
- Track progress based on indicators
- Strengthen ESG initiatives (proactive disclosure)

Progress toward solving challenges

Society/Customers

- CO2 emissions reduction contribution: 12 mn tons
- Reduction of CO2 emissions from our activities: 60% (vs. FY2020)
- Enhance circularity of equipment & facilities (gas pipes, etc)
- Address procurement risks
- Maintain record of no major city gas accidents or supply disruptions
- Provide services supporting physically & mentally enriching lives

Tokyo Gas Group (Us)

- Measure Group employee engagement indicators and make improvements
- Seeking to ensure human rights are upheld throughout our supply chain

3 -5. Implement financial strategy

Control balance sheet and cash flow to strengthen the financial base supporting our growth

Focuses

■Transform: Manage business portfolio according to the ratio of expected returns (WACC), with consideration to each

segment's characteristics

■Value:

Achieve long-term growth and increase enterprise value by making growth investments while maintaining financial

soundness

Actions for FY2023-25

Cash inflows

Create stable cash inflows

- Maximize earning power of internal companies & major business subsidiaries by having them stand on their own feet
- Create operating cash flows that exceed the preceding medium-term management plan (FY2020-2022)

Soundness & efficiency

Maintain a lean & resilient balance sheet that supports growth investment

- Ensure financial soundness through investment discipline mindful of credit ratings and through cash flow management
- Improve asset efficiency by investing in and selling assets based on their earning power

Enterprise value growth investment

Pursue business management aimed at increasing enterprise value

- Manage asset efficiency based on expected returns of each segment
- Engage in sophisticated investment capacity management by refining cash flow forecasts
- Accelerate decarbonization investment through quantitative assessment of environmental value

wnere	we w	ant to	o be in	2025

Quantitative indicators	Now (FY2020-22 average)	FY2025
Segment profits*1 (operating profit + equity income of subsidiaries)	130 bn yen	150 bn yen
ROA*1	3.0%	approx. 4%
ROE*1	7.3%	approx. 8%
D/E ratio	0.91	approx. 0.9

^{*1} Profits after revision of sliding time lag effects

Shareholder returns

Total return ratio of approx. 40% (general goal for each fiscal year)

To be applied starting with fiscal year-end dividends for year ending March 2024

- **Policy**
- Acquisition of treasury stock for retirement will be considered as one way of providing shareholder return in addition to dividends and aims for total return ratio (ratio of dividends on current consolidated net income and acquisition of own shares) will be around 40% in each fiscal year.
- With regard to dividends, we will continue to provide stable dividends and will gradually increase dividends in accordance with growth while comprehensively taking into consideration the profit level over the medium- to long-term.

5. KPIs & Investment Plan

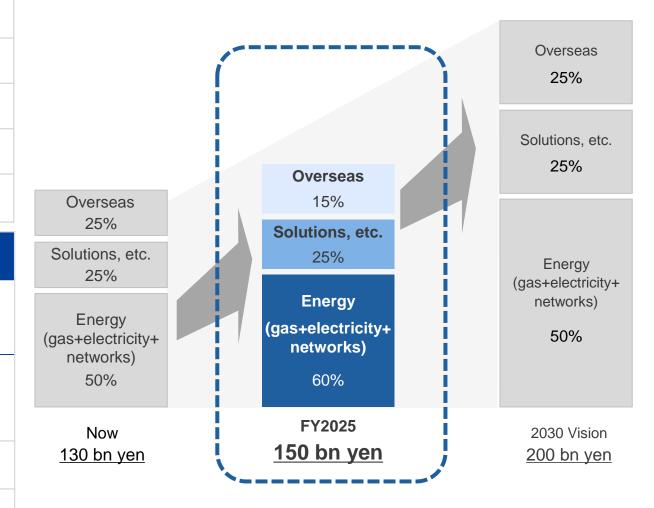

5. KPIs & Investment Plan
